ACKNOWLEDGMENTS AND SPECIAL PARTICIPATION

[Thanks to..](#)

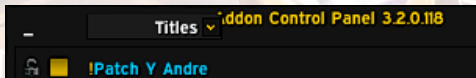

Patch-Y check version

You can use a command to know who in your Raid/Party is with Patch-Y enabled.

`/pyversion`

```
[PatchY Andre] Verifying versions...  
[PatchY Andre] Results:  
Shiryu (3.0.0)  
Lirio (3.0.0)  
Patch-Y offline: Pelucia
```

Be sure **!Patch Y Andre** addon is enabled to use this slash command.

This command only works between players who have the addon active. If you use the command and it returns "Patch-Y offline," it could mean:

- The player is using a outdated version prior to 3.0;
- The player is using the correct patch but disabled my addon on their own;
- The player is offline.

SpellVisualKitModelAttach.dbc

INSTRUCTIONS (English Version)

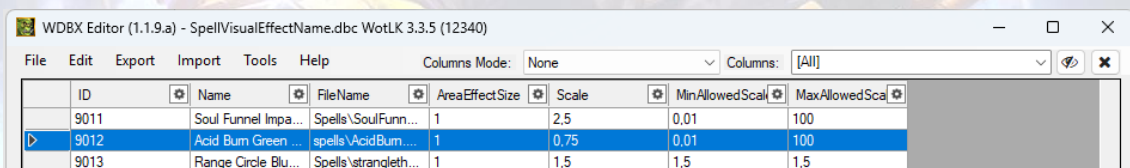

All the data used to make the necessary changes is below each image.

Along with this manual, I will publish a text file in case anyone has difficulty reading any of the screenshots.

Note that each .dbc table has its own header pattern. Whenever I share instructions used to modify a function, I will provide them in the same column order as the original table. In some cases, it will be necessary to create new rows and not just modify an existing one, as I did in the previous version of Patch 2.0. Therefore, if you already use a modified AIO patch, be aware that the IDs to create them may need adaptation for your case. In my case, I used numbers above 8,000 (Vegeta's meme) and 90,000 because I consider that some patches use custom-created IDs to fit the HD spells patch and may be used by other content creators.

Example 1

SpellVisualEffectName.dbc - 9012 Acid Burn Green 0,75 spells\AcidBurn.mdx 1 0,75 0,01 100

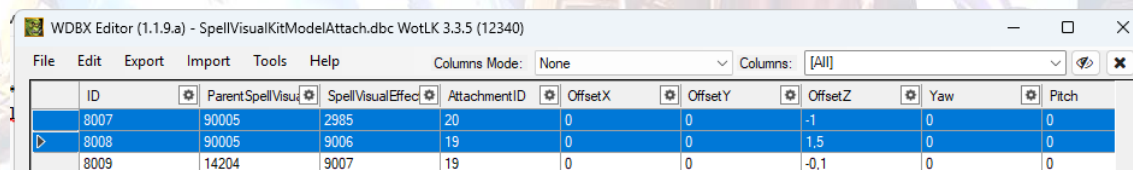

ID	Name	FileName	AreaEffectSize	Scale	MinAllowedScale	MaxAllowedScale
9011	Soul Funnel Impa...	Spells\SoulFunn...	1	2,5	0,01	100
9012	Acid Burn Green ...	spells\AcidBurn...	1	0,75	0,01	100
9013	Range Circle Blu...	Spells\strangleth...	1	1,5	1,5	1,5

Example 2

SpellVisualKitModelAttach.dbc - 8007 90005 2985 20 0 0 -1
SpellVisualKitModelAttach.dbc - 8008 90005 9006 19 0 0 1,5

*If there are no more numbers in my instructions, fill in with zeros or leave blank (depending on the table used).

ID	ParentSpellVisual	SpellVisualEffect	AttachmentID	OffsetX	OffsetY	OffsetZ	Yaw	Pitch
8007	90005	2985	20	0	0	-1	0	0
8008	90005	9006	19	0	0	1,5	0	0
8009	14204	9007	19	0	0	-0,1	0	0

INSTRUÇÕES (Versão Português)

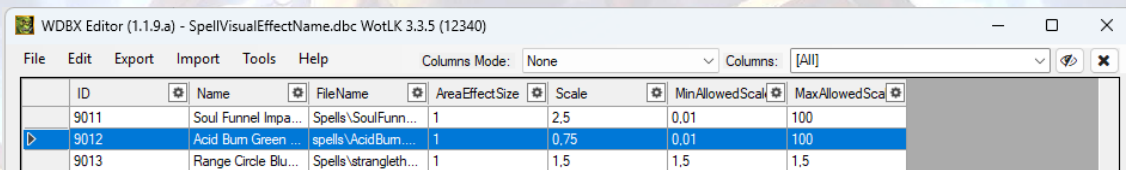

Todos os dados usados para fazer as alterações necessárias estão abaixo de cada imagem.

Junto com este manual, publicarei um arquivo de texto caso alguém tenha dificuldade em ler alguma das capturas de tela.

Observe que cada tabela .dbc possui seu próprio padrão de cabeçalho. Sempre que eu compartilhar instruções usadas para modificar uma função, as fornecerei na mesma ordem de colunas da tabela original. Em alguns casos, será necessário criar novas linhas e não apenas modificar uma existente, como fiz na versão anterior do Patch 2.0. Por isso se você já usa um patch AIO modificado se atente que os ID para criar podem precisar de adaptação para o seu caso. No meu caso usei números acima de 8.000 (meme do vegeta) e 90.000 por considerar que alguns patches que usam IDs criados de maneira personalizada para se adequar com o patch HD spells e podem ser utilizados por outros criadores de conteúdo.

Exemplo 1

SpellVisualEffectName.dbc - 9012 Acid Burn Green 0,75 spells\AcidBurn.mdx 1 0,75 0,01 100

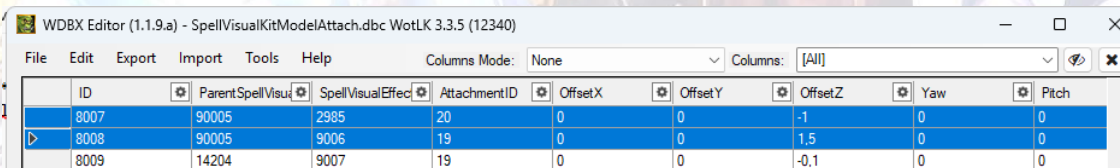

ID	Name	FileName	AreaEffectSize	Scale	MinAllowedScale	MaxAllowedScale
9011	Soul Funnel Impa...	Spells\SoulFunn...	1	2.5	0.01	100
9012	Acid Burn Green ...	spells\AcidBurn...	1	0.75	0.01	100
9013	Range Circle Blu...	Spells\strangleth...	1	1.5	1.5	1.5

Exemplo 2

SpellVisualKitModelAttach.dbc - 8007 90005 2985 20 0 0 -1
SpellVisualKitModelAttach.dbc - 8008 90005 9006 19 0 0 1,5

* Se não houver mais números nas minhas instruções, preencha com zeros ou deixe em branco (dependendo da tabela utilizada).

ID	ParentSpellVisual	SpellVisualEffect	AttachmentID	OffsetX	OffsetY	OffsetZ	Yaw	Pitch
8007	90005	2985	20	0	0	-1	0	0
8008	90005	9006	19	0	0	1.5	0	0
8009	14204	9007	19	0	0	-0.1	0	0

Ah! E as instruções estarão em inglês. Qualquer coisa usa google tradutor.

HALION (Twilight Cutter Guide/Ruler)

Pre-cutter and new orbs.

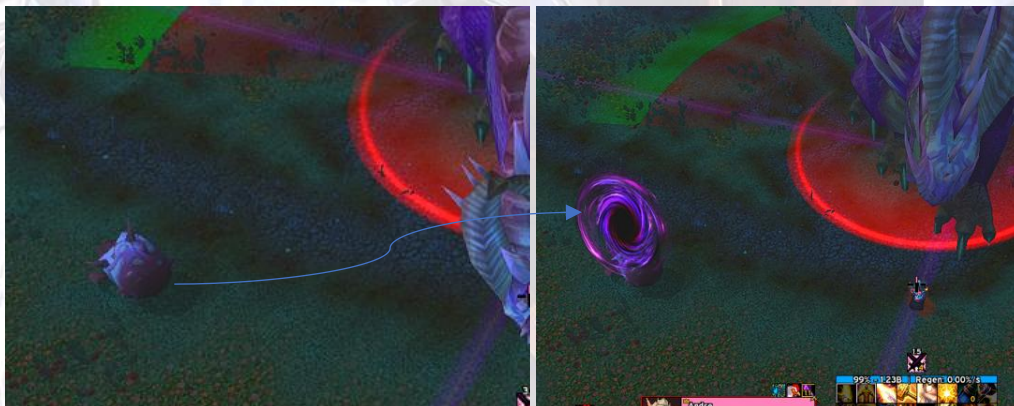

All the models below were created by [Dribble](#). He is a very valuable partner to our community.

HALION (Pre-portal)

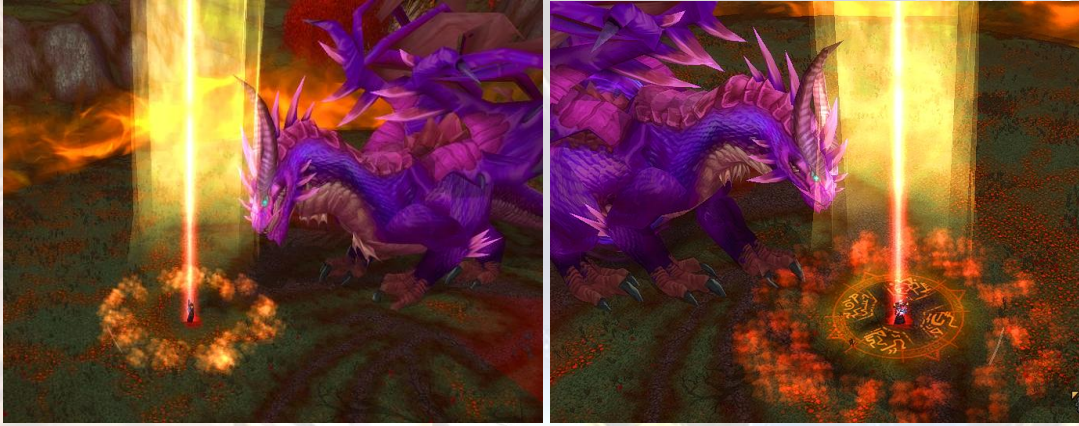

Dragon egg indicating where portals will spawns

All the models below were created by [Dribble](#). He is a very valuable partner to our community.

HALION (Pre-Meteor Strike)

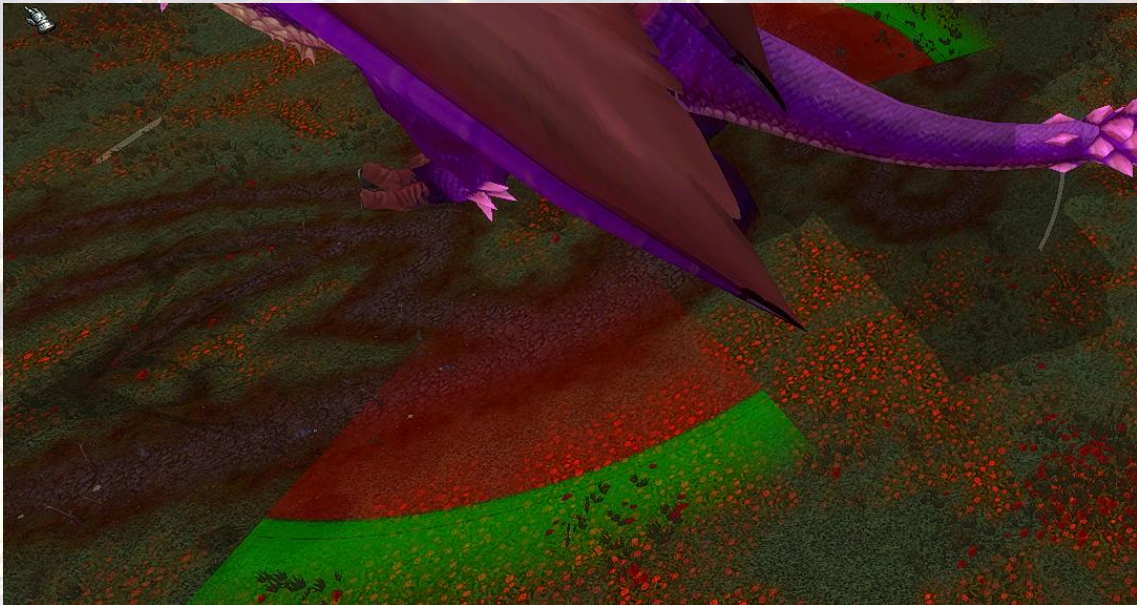

New Animation for meteor strike

HALION (Position Aid Redesign)

More smooth and with aggro indicator for tanks (head and tail).

The original model was created by [Dribbble](#), and I edited it up to this point. Since my patch is an AIO (All-in-One), some mechanics might overlap, and to avoid visual clutter with too much information, I had to edit the Halion to fit perfectly with the other models, without losing the essence of the original work.

OBSIDIAN SANCTUM

Sartharion

Lava Strike

EYE OF ETERNITY

Malygos

Arcane Breath

TRIAL OF THE CRUSADER

Jaraxxus

Legion Flame

Faction Champions - PVP model arrangement

Large >> Melees

Medium >> Dangerous casters

Small >> Healers and others not dangerous

Twin Val'kyr

Light Vortex + Dark Vortex (pre cast)

Shield of Light + Shield of Darkness (cast)

Anub'arak

Shadow Strike + Submerge

Pursued by Anub

XT-002

Searing Light and Gravity Bomb

The Assembly Of Iron

Rune reverted to the original

Fix Overload circle 20yd size

Fix Fusion Punch max size

Kologarn

No picture

Boss size reduced to 85% (100% > 85%)

Mimiron

Proximity Mines

Frost Bomb + Shock Blast

Rocket Strike

Boss size reduced 100% > 80%

Freya

Healthy Spore circle + Unstable Energy new animation

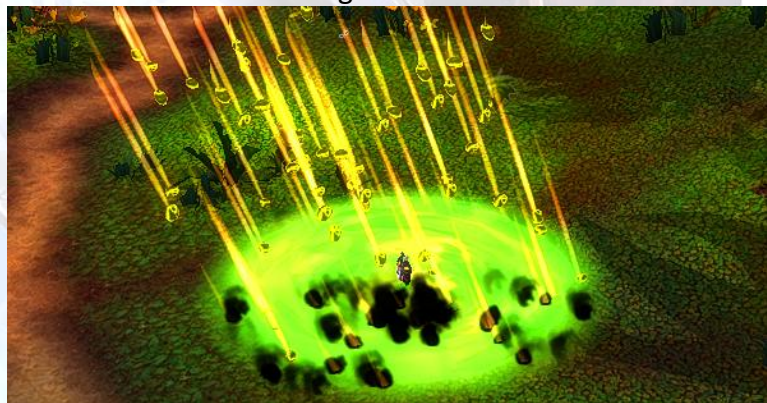

Nature's Fury

Nature Bomb

Trash Hurricane - The hurricane in this trash game was the same as the druid players. I changed it to create a sense of danger and avoid confusion with druid players.

Thorim
Charge Orb

Lightning Charge

Blizzard (Sif) now have snow on the ground

Hodir

Flash Freeze - Pre-cast is now golden + New platform model

Conjure Toasty Fire

Storm Cloud

Starlight

Vezaxx

Mark of the Faceless + Boss and big adds 100% to 85%

Yogg-Saron

Portal Numbers

Cloud + Summon Guardian

Untouchable = green and circled

When active (move/step) = red

Malady of the Mind new animation

Algalon the Observer
Cosmic Smash

Big Bang - There's no photo. I'm too lazy. Go there and check the change for yourself.

Lady Deathwhisper

Summon Spirits (Redesign)

Necrotic Strike – player will not be green anymore

Trash Mobs

BPC trash Chains - Did you see the light? Don't think twice and use Mass Dispel on it.

Plague Cloud (Blighted Abomination) - Spell fix

Frozen Orb (Ymirjar Frostbinder) - More visible cast + missile target.

Festergut

Gas Spore Range - Don't need to stack all as one. Just be inside green circle to get buff
Inoculated

Inoculated

Unlimited range

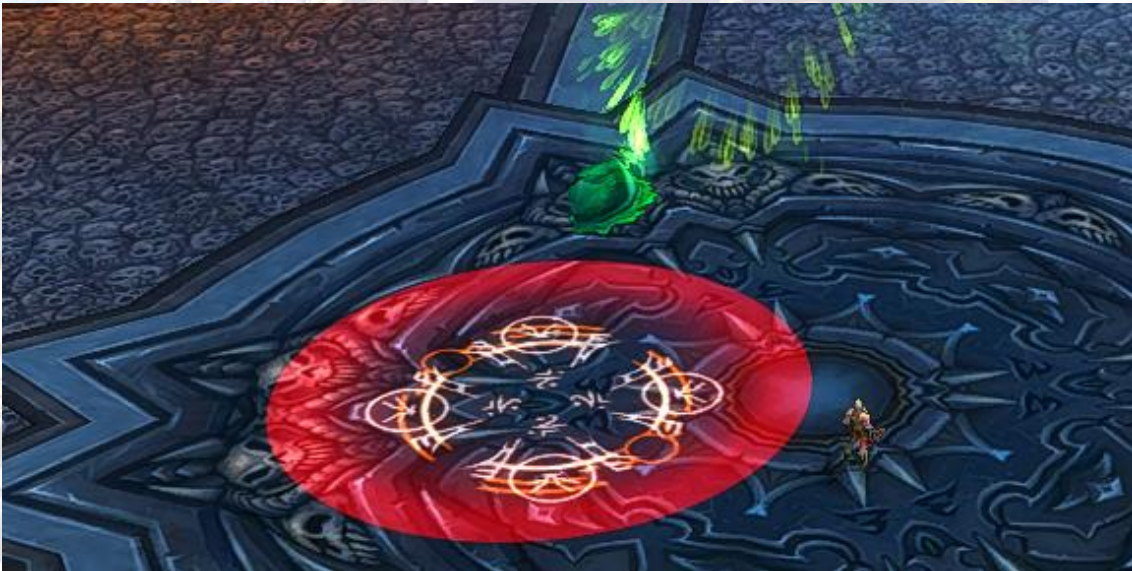

Instant

You have become resistant to the blight, decreasing Shadow damage taken by 25% for 2 min. Stacks up to 3 times.

Professor Putricide

Malleable Goo new cleaner Animation

BQL

Swarming Shadows even brighter for those using the low setting.

Sindragosa

Frost Bomb more visible

Lich King

Ice pulse - Final version. Director's cut.

DO NOT stand near other players. Move to the sides. Respect the red circle.

NPC

Bigger models - Jeeves + Scrapbot + Darkfallen Commander

Darnavan – DO NOT fail on quest anymore

Shadowfiend

Bonfire is 2x bigger in all world because is need for Ulduar Hodir battle (Toasty Fire)

Others

...And more i don't remember

Mana Tide has a new form when active. When the spell ends or the totem is removed, it reverts to the default form.

Hymn of Hope and **Divine** now are bigger to see them on every place in boss fight

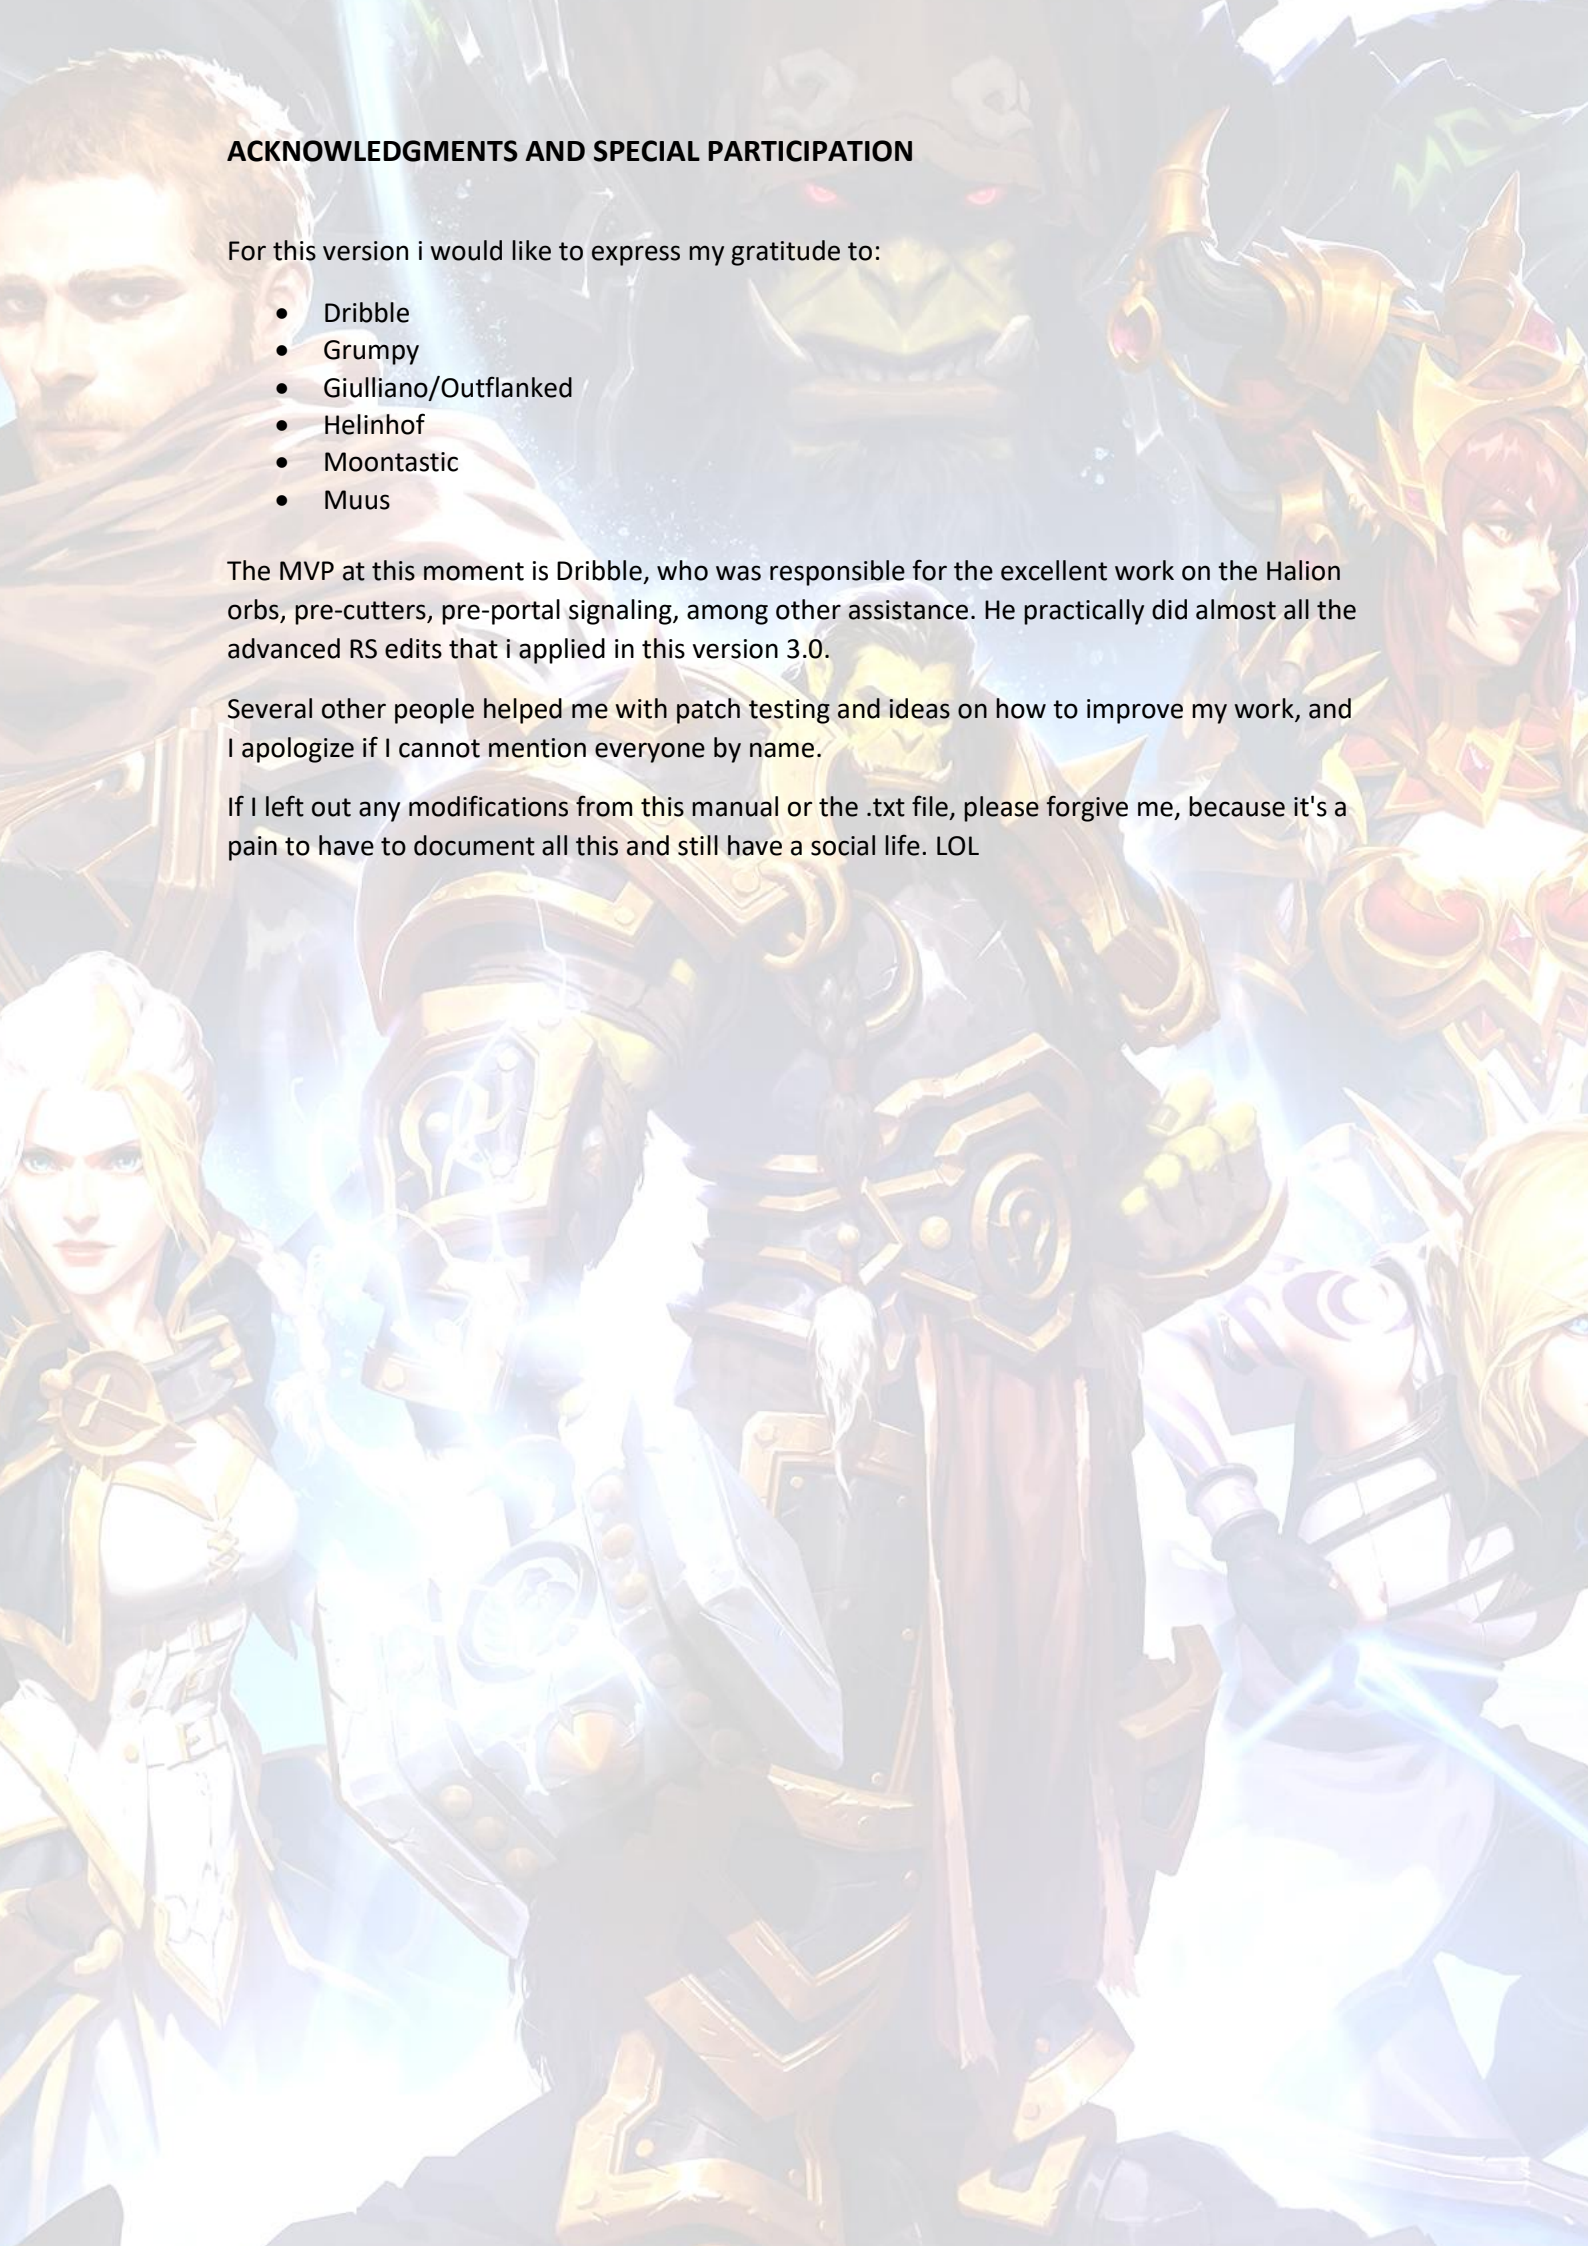

Deterrence and **Shield Block** now have gold shield in front of player due block mechanic

Frost trap and **Explosive trap** active texture changed

ACKNOWLEDGMENTS AND SPECIAL PARTICIPATION

For this version i would like to express my gratitude to:

- Dribble
- Grumpy
- Giulliano/Outflanked
- Helinhof
- Moontastic
- Muus

The MVP at this moment is Dribble, who was responsible for the excellent work on the Halion orbs, pre-cutters, pre-portal signaling, among other assistance. He practically did almost all the advanced RS edits that i applied in this version 3.0.

Several other people helped me with patch testing and ideas on how to improve my work, and I apologize if I cannot mention everyone by name.

If I left out any modifications from this manual or the .txt file, please forgive me, because it's a pain to have to document all this and still have a social life. LOL
